Aged Care Financial Performance Survey

Registration Kit 2021

Thank you for your interest in participating in our Aged Care Financial Performance Surveys. We are pleased to provide you with this Registration Kit and look forward to your future participation in this survey process.

The Registration Kit contains all of the information that you will need to understand the survey process, the outcomes of the survey as well as the responsibilities of each of the parties to the survey. You are encouraged to read the documentation contained in this kit carefully. Please contact us if there is something that you need clarified. We encourage all of our participants to be completely aware of the processes and responsibilities prior to signing on for the survey. The majority of these are set out within the terms and conditions of the program.

KIT CONTENTS

This Registration Kit consists of the following documents:

1. Application form
2. Survey Timetable
3. Terms and Conditions of the Survey
4. Price Structure
5. Contact Details

Once you have registered to participate in our survey you will be provided with a Participant's Kit. This contains all the forms in both a hard copy and electronic format to be able to provide us with your data in the proper format. You are also provided with a detailed line-by-line description of what should be included (and what should be excluded) in any particular data line item. This helps us to ensure that the data that we are comparing and analysing is actually comparable.

Robert Krebs
Senior Business Analyst & Benchmark Services
robert.krebs@stewartbrown.com.au

Vicky Stimson

BACKGROUND & PURPOSE OF SURVEY

It is important for all participants to understand some of the background and purpose of the survey and its outcomes. This service grew out of a need by management to be able to compare and contrast their operations to that of other facilities within the industry. This was to assist them in improving the financial performance of their operations and to ultimately adopt best practice. Over a number of years, the format of the results of the survey has changed. However, at all times the predominant purpose has remained the same, that is, to provide a tool to assist management to improve financial performance.

The results of the survey may also be used for other purposes. It is likely that summary data will be used by industry bodies to lobby Government and in the formulation of policy. If data is provided to outside parties, at no time are the results of individual participating organisations identified. The only data supplied is in a summary format.
